

ISSHAN MARWAH

TECHNICAL ART & GAME DEVELOPMENT | UNREAL ENGINE 5 | PCG | C++ | BLUEPRINTS | 3D ART

issshanmarwah@gmail.com | +1 905 243 7529 (Canada) | +91 7827791024 (India) | Ontario, Canada

PROFILE

Game Development and Interactive Media student at Ontario Tech University focused on Technical Art, Unreal Engine tools, procedural workflows and real-time content creation. Builds artist-facing UE5 tools with PCG, Blueprints and C++, alongside gameplay/AI systems and game-ready 3D assets. Experienced with procedural ecosystem generation, Unreal Editor utilities, debugging, optimization and engine integration. Seeking Technical Artist / Technical Game Development internship opportunities.

TECHNICAL SKILLS

Game Engines & Programming: Unreal Engine 5.8, C++, Blueprints, PCG, Editor Utility Widgets, Editor Modules, Python, Unity 2D/3D, C#, Git/GitLab

Technical Art & Tools: artist-facing procedural tools, PCG ecosystems, spline/Landscape workflows, terrain filtering, weighted mesh variation, Landscape layers, spline exclusions, LODs, Nanite, collision/UCX, optimization

Gameplay & AI: Enhanced Input, FPS movement/combat, line-trace shooting, recoil/headshots, weapon systems, Behavior Trees, EQS, cover AI, navigation, Chaos destruction

3D Art & Animation: Blender, Autodesk 3ds Max, Substance Painter, hard-surface & polygon modeling, UVs, PBR texturing, game-ready optimization, animation retargeting, IK, engine integration

Additional: Selenium/UI automation, API validation, MySQL, HTML/CSS, Photoshop, Premiere Pro, After Effects, Arduino

EXPERIENCE

Game Art Intern - Unreal Engine / Technical Art | Lakshya Digital | India

May 2026 - Aug 2026

- Independently developed an Unreal Engine 5 FPS prototype in C++ and Blueprints with movement, sprint/crouch/jump, aiming/FOV, weapon switching, recoil, line-trace shooting, hit/headshot logic and combat feedback.
- Built enemy AI with Behavior Trees and EQS for player detection, pushing, cover selection, repositioning, peeking and shooting based on environment queries and combat state.
- Developed a configurable UE5 PCG ecosystem generator with artist-facing controls for terrain/slope/height filtering, density/spacing, weighted meshes, Landscape paint masks, spline exclusions and vegetation relationships.
- Created Unreal Editor tools in Blueprints and C++ for unused-asset scanning, selected asset cleanup and empty-folder detection/removal; explored LOD, Nanite and collision workflow utilities.

Technical / Automation Intern | Virgin Mobile UAE | Dubai, UAE

3-month internship

- Built Python/Selenium QA automation for broken images, missing content and page-load issues; performed UI automation and API validation.
- Used GitLab workflows and prepared technical reports/presentations to communicate automation findings and results.

SELECTED PROJECTS

Artist-Facing Procedural Ecosystem Tool | Unreal Engine 5.8 | PCG | Blueprint

- Built a closed-spline biome generator for Trees, Grass, Rocks and secondary vegetation with Blueprint-exposed controls for global density/seed, sampling, spacing, slope, border falloff, height ranges and follow-slope rotation.
- Added Low/High Tree elevation splitting and blending, noise-driven grass patches, tree/rock clearances, near-tree secondary vegetation, weighted mesh selection with overall/per-mesh transforms, Landscape layer filtering and Actor/Landscape spline exclusions.

Unreal Engine FPS Combat & Advanced AI Prototype | Unreal Engine 5 | C++ | Blueprints | Behavior Trees | EQS

- Created a complete FPS gameplay loop and cover-based AI using EQS, combat states, peeking/shooting behavior, animations and Chaos-enabled destructible props.

Vector of Fear - Sci-Fi Horror Game | Unity | C# | 3D Art | Animation

- Created game-ready robotic enemies, first-person hand animation and environment assets; received Ubisoft's Best Choice recognition and was showcased at Level Up.

EDUCATION

B.IT - Game Development and Interactive Media | Ontario Tech University | Ontario, Canada

2024 - Present

- GPA: 3.86 | Focus: game programming, 3D art, animation, interactive systems and real-time engine integration.

ADDITIONAL TRAINING

MAAC India: Autodesk 3ds Max, Photoshop, Premiere Pro & After Effects; 3D modeling, UVs, texturing, rendering, motion graphics and video editing.
